

Description

Aquafactors has not rushed into competing in the small hand cart / trolley system market which has always suffered with capacity problems. However, with owners of hotels, residential homes and other large buildings wanting to use their own maintenance personnel, with poles, the requirement for a mobile system, able to provide pure water where and when they want, in quantity, quickly and efficiently, has grown. In several instances the need has been for a system capable of being manoeuvred through a building, up in a lift, along corridors and onto a roof to clean penthouse windows.

The Aquafactors trolley system meets this demand in several ways. Although not a small system it is able to go through a doorway 735mm wide. It carries a massive 360 litres of water. It has its own battery power supply, pump, 'Vari-stream' controller and 20 metre retractable hose reel. With the emphasis on water carrying ability, the water treatment implications are kept 'simple' with an onboard deioniser. The tank is based on the company's highly successful thermo crafted, baffled unit, used with all its mobile systems. It is totally impervious to light and is amazing strong and light-weight. The large tyres make handling easy and the trolley is braked. The trolley weighs 542kg when full and 166kg when empty.

System Contents

- 360 litre baffled tank with plates, studs, water level indicator.
- 12v 'Shurflo' pump with fuse.
- 'Vari-stream' controller.
- 2 x 822 DI tanks complete with inlet & outlet ports, riser tube & upper & lower distributors.
- 2 x 25 litres of deionised mixed bed resin.
- TDS Monitor.
- 20 metres of hose on 'Retracta' spring rewind reel.
- 50 metres of hose on thru cart.

- 2 x 2 metres of hose with fittings.
- Tap connector.
- Battery charger.
- Heavy duty battery and battery box.
- 4 wheel trolley with pneumatic tyres (Size: Length 1600 mm x Width 730 mm x Height 1200 mm).

Product	Price	3 yr lease	5 yr lease
360 L Trolley System	£3145.00	£109.13	£74.23

Lease purchase prices are shown as monthly payments excl. VAT. Rates vary and therefore the above examples are quoted for guidance only.

Tucker® Pole Systems should not be used anywhere near or allowed to touch ELECTRICAL WIRES or OVERHEAD CABLES
