

Crystal Clear 550

Glass Clearing Agent

Aquafactors
Janitorial
Supplies

- ★ Restores glass as quickly as cleaning it
- ★ Removes hard water spots and all Types of stage 1 corrosion
- ★ Restores glass surfaces clarity and quality

Aquafactors Janitorial Supplies are the UK distributors for WINSOL Laboratory maintenance chemicals. WINSOL, based in Seattle, USA, have a successful thirty year track record in the development of high quality chemical compounds. They produce a range of cleaners for glass, awnings and fascias. Their technical expertise, related to the transportation and aerospace industries, has made some of their product lines industry leaders. All formulations are produced with food and cosmetic grade chemicals and follow strict environmental guidelines.

Crystal Clear 550 has become an industry standard in non-abrasive glass restoration. **Crystal Clear 550** is able to restore the damage done by water spots, pollution, building runoff, mineral deposits and alkaline haze. Where glass is lightly etched with stage 1 corrosion, **Crystal Clear 550** can make this less noticeable on uncoated, clear and float-glass surfaces.

Glass corrosion is a complex chemical reaction and does not respond to traditional cleaning methods. However, with the proper use of **Crystal Clear 550** the problems outlined above can be overcome in one easy step.

Crystal Clear 550 will dissolve away the mineral deposits from the surface of the glass and help prevent redepositing later by cleaning out any rough areas where such deposits can become trapped. As **Crystal Clear 550** is an acid-based product, it has the ability to dissolve alkaline residues found in the rough pits and build-up ridges, on the glass, caused by corrosive materials. It will clean glass until it looks almost like new.

Crystal Clear 550 can have dramatically good results. It cannot, however, repair physically damaged glass or correct stage 2 corrosion. With the latter it may expose more of an existing problem.

Crystal Clear 550 can be applied with a sponge or cloth and then rinsed away. *Care must be exercised when using this product as it is acid-based.* Full guidelines are explained with the product. Available in 3.78 litres (1 US gallon) containers.
