

Aluma Wash

Inhibited-Aluminium Cleaner

Aquafactors
Janitorial
Supplies

Aluma Wash is specially formulated to clean 'hi tech' aluminium floors, building fascias and cladding, window frames, platforms and walls. It is able to cut through airborne pollution including hydrocarbons, accumulated traffic film, greasy smudges and heavily soiled surfaces. Special inhibitors help to prevent corrosion. It also has a wide variety of uses in general cleaning, including work surfaces, tables and tools.

Aluma Wash is non-corrosive and may be used in any application requiring heavy duty cleaning and rapid degreasing. It must be used sparingly where there is likelihood of seepage through to electrical or air conducting. Once clean, and surfaces are residue free, they will not attract additional soiling. **Aluma Wash** retards aluminium blush.

Aluma Wash must not be used undiluted (see instructions). Surfaces should be cleaned and always rinsed off thoroughly.

Available in 3.78 litres (1 US gallon) containers.

- ★ Non-corrosive (safe for all metals)
- ★ Residue free. Will not re-attract soiling
- ★ Ideal for stainless steel & aluminium
- ★ Economical - spray on & wipe off

Aquafactors Janitorial Supplies are the UK distributors for WINSOL Laboratory maintenance chemicals. WINSOL, based in Seattle, USA, have a successful thirty year track record in the development of high quality chemical compounds. They produce a range of cleaners for glass, awnings and fascias. Their technical Expertise, related to the transportation and aerospace industries, has made some of their product lines industry leaders. All formulations are produced with food and cosmetic grade chemicals and follow strict environmental guidelines.
